Pasig City, Metro Manila, PH | P: +63 9386747601 | jeffsalvador.dev@gmail.com | jefferson-salvador-portfolio

PROFESSIONAL SUMMARY

Full Stack Developer with 4 years of experience building web applications using React, Next.js, Go, TypeScript, SQL Server, and REST/gRPC APIs. Experienced in developing frontend interfaces, backend services, microservice architectures, and database-driven applications in Agile environments. Passionate about writing maintainable code and continuously improving software quality.

EXPERIENCE

SOFTWARE ALGO SOLUTIONS, LLC – Los Angeles, California

Full Stack Developer | *React • Next.js • Go • TypeScript • SQL Server*

2021- Present

Crypto Trading Platform

Tech: *React, Next.js, Go, SQL Server, REST APIs*

- Designed and developed approximately 30% of a crypto trading platform using React, Next.js, Go, and SQL Server, contributing to over \$500,000 in revenue within two months while supporting more than 1,000 active users.
- Designed and implemented full-stack features using React, Next.js, Go, and SQL Server to support new trading capabilities.
- Improved frontend performance through lazy loading, optimized rendering, and responsive UI, reducing page load times and improving user experience.
- Accelerated development cycles by 20% by collaborating with 5+ cross-functional teams using Agile methodologies, Git workflows, and Azure DevOps sprint planning.
- Managed application deployments using Azure Pipelines and collaborated with the team through Azure Boards for sprint planning and task tracking within a Scrum Agile environment.

Bank Clearing System

Tech: *React, Go, gRPC, Protocol Buffers, SQL Server*

- Reduced post-release defects by 25% through structured code reviews, unit testing, and API validation using Postman and Swagger.
- Developed and maintained full-stack features using Next.js, React, TypeScript, Go, C#, SQL Server, and REST/gRPC APIs in a microservices architecture.
- Improved front-end performance by optimizing component rendering, lazy loading, and responsive layouts using React, Material UI, Tailwind, and Bootstrap.
- Developed and maintained backend services within a 500+ microservice bank clearing platform supporting transaction processing and clearing operations.
- Containerized backend services using Docker to ensure consistent local development and deployment environments.
- Collaborated with the team in deploying and maintaining applications hosted on AWS.

AI Support Platform

Tech: *Next.js, Go, gRPC, Protocol Buffers, SQL Server*

- Improved AI response accuracy by implementing an admin-managed configuration feature for stored procedure names, parameters, and descriptions, enabling dynamic execution of backend procedures based on user queries.
- Enhanced the AI support portal through UI improvements, including updates to the Retrieval-Augmented Generation (RAG) interface.

Trading Limits Threshold Services

Tech: *Go, HTTP, CLI, SQL Server*

- Architected and developed a background service from scratch using Go, HTTP, and CLI to automatically retrieve CME and equity trading limits.
- Automated the retrieval and processing of trading threshold data, reducing manual effort and improving data availability for downstream systems.
- Built a command-line interface (CLI) for configuring and running services in different environments.

Employee Portal & Task Management System

Tech: *Angular, C#, .NET*

- Enhanced and maintained company employee portal and task management system improving usability, fixing legacy issues, and supporting internal operations.
- Implemented a time logging audit system to track time log changes and maintain a complete audit trail for project progress.

Jewelry Inventory System

Tech: *Next.js, Node.js, SQL Server*

- Led the end-to-end development of a full-stack jewelry inventory system from requirements gathering through deployment.
- Implemented secure JWT authentication and role-based access control (RBAC) to manage user permissions and secure access to inventory management features.
- Built CRUD operations, inventory tracking, and database-driven reporting.

LEADERSHIP & MENTORING

- Mentored junior developers on React, Go, Git workflows, and debugging techniques.
- Assisted teammates with code reviews and technical problem solving.
- Helped onboard new developers by sharing development practices and project knowledge.
- Collaborated with team leads during sprint planning and technical discussions.

EDUCATION

TECHNOLOGICAL UNIVERSITY OF THE PHILIPPINES – Manila, Philippines

August 2022

- Bachelor of Science, Information Technology
- Cum Laude Cumulative GPA 1.51(93%)
- 3rd Place in C Language Competition
- Dean's Lister/ President's Lister (2018 - 2022)

ASIAN INSTITUTE OF COMPUTER STUDIES – Cavite, Philippines

April 2018

- Valedictorian
- Cumulative GPA: 93.51
- Best in Programming
- Best in Social Science
- Best Thesis Awardee

ADDITIONAL

Frontend: React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, Material UI

Backend: Go, REST API, gRPC, Protocol Buffers

Database: SQL Server, MongoDB

Cloud & DevOps: Microsoft Azure, Azure DevOps (Azure Boards, Azure Pipelines), Docker

Tools: Git, GitHub, Postman, Swagger

Languages: Fluent in Tagalog; Conversational Proficiency in English

Certifications & Training: Introduction to Computer System Servicing (TESDA); Intermediate Microsoft Excel for Teachers (ERYUTech)
